## The Best Relaytion

## P2 Relay

2 pole telecom relay, polarized,
Through Hole Type (THT) or Surface Mount Technology (SMT),

Relay types: non-latching with 1 coil latching with 2 coils latching with 1 coil

## Features

- Standard telecom relay (ringing and test access)
- Slim line $15 \times 7.5 \mathrm{~mm}, 0.590 \times 0.295$ inch
- Switching current 5 A
- 2 changeover contacts ( 2 form C / DPDT)
- Bifurcated contacts
- Immersion cleanable
- High sensitivity results in low nominal power consumption 140 mW for non-latching and latching with 2 coils 70 mW for latching with 1 coil
- For single coil version:
- Surge voltage resistance between contact and coil for single coil version:
- $2.5 \mathrm{kV}(2 / 10 \mu \mathrm{sec})$ meets the Bellcore Requirement GR-1089
- $1.5 \mathrm{kV}(10 / 160 \mu \mathrm{sec})$ meets FCC Part 68

## Typical applications

- Communications equipment
linecard application (ringing and test access) PABX
Voice over IP
- Office equipment
- Measurement and control equipment
- Automotive equipment

CAN bus, keyless entry, speaker switch

- Medical equipment
- Consumer electronics

Set Top Boxes, HiFi

## Options

- 1500 Vrms between open contacts
- Temperature range up to $105^{\circ} \mathrm{C}$

LR 45064-23

E 48393

## IM Relays

$4^{\text {th }}$ generation slim line - low profile polarized $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 1.5 ... 24 V , coil power consumption of 140 ... 200 mW , latching relays with 1 coil 100 mW . The IM relay is available as through hole and surface mount type ( J -Legs and Gull Wings) and capable to switch loads up to $60 \mathrm{~W} / 62,5 \mathrm{VA}$. Dielectric strength fulfills the Bellcore requirements according GR 1089 ( $2,5 \mathrm{kV}$ $2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The IM relay is CECC/IECQ approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. $10 \times 6 \mathrm{~mm}$ board space and 5.65 mm height

## P2 Relays

$3^{\text {rd }}$ generation polarized $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 24 V , coil power consumption 140 mW , latching relays with 1 coil 70 mW . The P 2 relay is available as through hole or surface mount type and capable to switch currents up to 5 A . Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and 10 mm height.

## FX Relays

$3^{\text {rd }}$ generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 3 ... 48 V , coil power consumption of 80 ... 260 mW for the high sensitive version, $140 \ldots 300 \mathrm{~mW}$ for the standard version, latching relays with 1 coil 100 mW . The FX2 relay is available as through hole type and capable to switch loads up to 60 W/62,5 VA. Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The FX2 is CECC/IECO approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and $10,7 \mathrm{~mm}$ height.

## FT2 / FU2 Relays

$3^{\text {rd }}$ generation non polarized, non latching $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts. Nominal voltage range from 3 ... 48 V , coil power consumption 200 ... 300 mW . Most sensitive 48 V relay. Available as through hole and surface mount type. Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The FT2/FU2 is CECC/IECO approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and 10 mm height.

## FP2 Relays

$3^{\text {rd }}$ generation polarized $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 48 V , coil power consumption of 80 ... 260 mW for the high sensitive version, $140 \ldots 300 \mathrm{~mW}$ for the standard version, latching relays with 1 coil 100 mW .. The FP2 relay is available as through hole type and capable to switch loads up to 30 W/62,5 VA. Dielectric strength fulfills FCC part 68 (1,5 kV - 10 / $160 \mu \mathrm{~s}$ ). The FP2 is CECC/IECQ approved. Dimensions approx. $14 \times 9 \mathrm{~mm}$ board space and 5 mm height.

## MT2 / MT4

$2^{\text {nd }}$ generation non polarized, non latching $2 \mathrm{c} / \mathrm{o}$ and $4 \mathrm{c} / \mathrm{o}$ telecom and signal relay with bifurcated contacts. Nominal voltage range from 4.5 ... 48 V , coil power consumption 150/200/300/400 and 550 mW , and 300 mW (MT4). Dielectric strength fulfills the
requirements according FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$ for both and the Bellcore requirements according GR 1089 ( $2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s}$ ) the MT4 only.
Dimensions MT2 approx. $20 \times 10 \mathrm{~mm}$ board space and 11 mm height, MT4 approx. $20 \times 15 \mathrm{~mm}$ board space and 11 mm height.

## D2n Relays

$2^{\text {nd }}$ generation non polarized $2 \mathrm{c} / \mathrm{o}$ relay for telecom and various other applications. Nominal voltage range from 3 ... 48 V , coil power consumption from 150 .... 500 mW . The D2n relay is capable to switch currents up to 3 A . Dielectric strength fulfills the requirements according FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. Dimensions approx. $20 \times 10 \mathrm{~mm}$ board space and $11,5 \mathrm{~mm}$ height.

## P1 Relays

Extremely sensitive, polarized $1 \mathrm{c} / \mathrm{o}$ relay with bifurcated contacts for a wide range of applications, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from $3 \ldots 24 \mathrm{~V}$, coil power consumption 65 mW , latching relays with 1 coil 30 mW . The P 1 relay is available as through hole or surface mount type and capable to switch currents up to 1 A . Dielectric strength fulfills the requirements according FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. Dimensions approx. $13 \times 7,6 \mathrm{~mm}$ board space and 7 mm height for THT or 8 mm height for SMT version.

## W11 Relays

Low cost, non polarized $1 \mathrm{c} /$ o relay for various applications. Nominal voltage range from $3 \ldots 24 \mathrm{~V}$, coil power consumption 450 mW , sensitive versions 200 mW . The W11 relay is capable to switch currents up to 3 A . Dielectric strength 1000 Vrms . Dimensions approx. $15,6 \times 10,6 \mathrm{~mm}$ board space and $11,5 \mathrm{~mm}$ height.

## Reed Relays

High sensitive, non polarized relay for telecom and various other applications, available with $1 \mathrm{n} / \mathrm{o}, 2 \mathrm{n} / \mathrm{o}$ or 1c/o contacts. Nominal voltage range from $5 \ldots 24 \mathrm{~V}$, coil power consumption $50 \ldots 280 \mathrm{~mW}$ for $1 \mathrm{n} / \mathrm{o}$ and 125 ... 280 mW for $2 \mathrm{n} / \mathrm{o}$ or $1 \mathrm{c} / \mathrm{o}$ versions. Reedrelays are available in DIP or SIL housing and capable to switch currents up to 0,5 A. Integrated diode and/or electrostatic shield optional. Dielectric strength 1500 Vdc. Dimensions approx. 19,3 $\times 7 \mathrm{~mm}$ board space and 5 ... $7,5 \mathrm{~mm}$ height for DIP or $19,8 \times 5 \mathrm{~mm}$ board space and $7,8 \mathrm{~mm}$ height for SIL version.

## Cradle Relays

Extremely reliable and mature relay family of $1^{\text {st }}$ generation for various signal switching applications. Available as non polarized, polarized / latching and relay with AC coil. The benefit is the possibility of combining various contact sets from 1 up to 6 poles, single and bifurcated contacts, different contact materials with a coil voltage range from $1,5 \mathrm{Vdc}$ to 220 Vac. Cradle relays are available as dust protected and hermetically sealed versions, with plug in or solder terminals and are capable to switch currents up to 5 A . Forcibly guided (linked) contact sets optional. Dielectric strength 500 Vrms. Dimensions from approx. $19 \times 24$ to $19 \times 35 \mathrm{~mm}$ board space and 30 mm height.

## Other Relays

We offer a variety of different relay families for maintenance and replacement purposes. These relays are up to 60 years old now, such as Card Relay SN (V23030 / V23031 series), Small General Purpose Relay (V23006 series), Small Polarized Relay (V23063 ... V23067 and V23163 ... V23167 series). Accessories like sockets, hold down springs, etc. optional.
