## The Best Relaytion

## W11 Relay

1 pole PCB relay, non-polarized,
Through Hole Type (THT)

| Relay types: | Non-latching, 1 coil <br>  <br>  <br>  <br>  <br>  <br> Terminal assignments symmetrical or assymetrical <br> 5-pin version |
| :--- | :--- |

## Features

- Multi purpose relay
- Small size permitting high packing density
- 1 changeover contact ( 1 form C / SPDT)

- 200 mW and 450 mW coils
- 1 A and 3 A contacts
- High shock resistance of 30 g
- Ambient temperature for sensitive version up to $85^{\circ} \mathrm{C}$
- Immersion cleanable

## Typical applications

- Security devices
- Electric door openers
- Duplex intercommunication systems
- Measurement and controls

Dimension drawing (in mm)

|  | V23101-Dxxx-Xxxx <br> mm |  |
| :--- | :--- | :--- |
| L | $15.5 \pm 0.1$ |  |
| W | $10.5 \pm 0.1$ | $0.610 \pm 0.004$ |
| H | $11.5-0.2$ | $0.413 \pm 0.004$ |
| T | $3.5-0.2$ | $0.138-0.008$ |

## Coil Data (values at $23^{\circ} \mathrm{C}$ )

| Nominal <br> voltage <br> Unom | Minimum <br> voltage $U_{1}$ | Maximum <br> voltage $U_{\text {II }}$ | Release/ <br> reset voltage <br> Minimum | Nominal power <br> consumption | Resistance |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

200 mW nominal power consumption

| 1.5 | 1.1 | 3.6 | 0.15 | 188 | 12 | 101 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 3 | 2.3 | 7.1 | 0.30 | 200 | 45 | 102 |
| 5 | 3.8 | 11.6 | 0.50 | 208 | 120 | 103 |
| 6 | 4.5 | 14.2 | 0.60 | 200 | 180 | 105 |
| 9 | 6.8 | 21.2 | 0.90 | 203 | 400 | 105 |
| 12 | 9.0 | 28.0 | 1.20 | 206 | 700 | 106 |
| 24 | 18.0 | 56.0 | 2.40 | 206 | 2800 | 107 |

$U_{1}=\quad$ Minimum voltage at $23^{\circ} \mathrm{C}$ after pre-energizing with nominal voltage without contact current
$U_{\text {II }}=\quad$ Maximum continous voltage at $23^{\circ}$
The operating voltage limits $U_{1}$ and $U_{\| I}$ depend on the temperature according to the formula:
$U_{1 \text { tamb }}=$
$K_{1} \cdot U_{123^{\circ}} \mathrm{C}$
and
$U_{I I \text { tamb }}=K_{\| I} \cdot U_{\| 23^{\circ} \mathrm{C}}$
$t_{\mathrm{amb}} \quad=$ Ambient temperature
$U_{1 \text { tamb }}=$ Minimum voltage at ambient temperature, $\mathrm{t}_{\mathrm{amb}}$
$U_{\text {Il tamb }} \quad=$ Maximum voltage at ambient temperature, $\mathrm{t}_{\text {amb }}$
$k_{1}, k_{\text {II }} \quad=$ Factors (dependent on temperature), see diagram

## Contact Data

| Number of contacts and type | 1 changeover contact |  |
| :---: | :---: | :---: |
| Contact assembly | single contacts |  |
| Contact material | AgPd, gold plated | AgNi |
| Limiting continous current at max. ambient temperature | 1 A | 3 A |
| Maximum switching current | 1.25 | 3 A |
| Maximum swichting voltage | 60 Vdc 125 Vac | $\begin{aligned} & 60 \mathrm{Vdc} \\ & 125 \mathrm{Vac} \end{aligned}$ |
| Maximum switching capacity | $30 \mathrm{~W} / 60 \mathrm{VA}$ | $72 \mathrm{~W} / 360 \mathrm{VA}$ |
| Thermoelectric potential | < $10 \mu \mathrm{~V}$ | $<10 \mu \mathrm{~V}$ |
| Initial contact resictance / measuring condition: $10 \mathrm{~mA} / 20 \mathrm{mV}$ | $100 \mathrm{~m} \Omega$ | $100 \mathrm{~m} \Omega$ |
| Electrical endurance standard: <br> at $24 \mathrm{Vdc} / 1 \mathrm{~A}$ <br> at $24 \mathrm{Vdc} / 2.5 \mathrm{~A}$ <br> at $120 \mathrm{Vac} / 0.5 \mathrm{~A}$ <br> at $120 \mathrm{Vac} / 1 \mathrm{~A}$ | $\begin{aligned} & 3 \times 10^{5} \\ & 1.5 \times 10^{5} \end{aligned}$ | $\begin{aligned} & 2 \times 10^{5} \\ & 4 \times 10^{5} \end{aligned}$ |
| sensitive: at $24 \mathrm{Vdc} / 1 \mathrm{~A}$ <br>  at $24 \mathrm{Vdc} / 2.5 \mathrm{~A}$ <br>  at $120 \mathrm{Vac} / 0.5 \mathrm{~A}$ <br>  at $120 \mathrm{Vac} / 1 \mathrm{~A}$ | $\begin{aligned} & 2 \times 10^{5} \\ & 1 \times 10^{5} \end{aligned}$ | $\begin{aligned} & 1 \times 10^{5} \\ & 3 \times 10^{5} \\ & \hline \end{aligned}$ |
| Mechanical endurance | typ. $10^{7}$ |  |

| InSulation | $>10^{9} \Omega$ |
| :--- | :---: |
| Insulation resistance at 500 VDC |  |
| Dielectric test voltage (1 min) <br> between coil and contacts <br> between open contacts | 1000 Vrms |
| 750 Vrms |  |

## High Frequency Data

Capacitance
between coil and contacts
max. 10 pF
between open contacts
max. 2 pF

## General data

| Operate time at $U_{\text {nom }}$ typ. / max. | $5 \mathrm{~ms} / 7 \mathrm{~ms}$ |
| :--- | :---: |
| Release time without diode in parallel, typ. / max. | $3 \mathrm{~ms} / 5 \mathrm{~ms}$ |
| Release time with diode in parallel, typ. / max. | $10 \mathrm{~ms} / 12 \mathrm{~ms}$ |
| Bounce time at closing contact, typ. / max. | $1 \mathrm{~ms} / 2 \mathrm{~ms} \mathrm{NO}$ contact |
| Maximum switching rate without load | $5 \mathrm{~ms} / 10 \mathrm{~ms}$ at NC conctact |
| Ambient temperature | 20 operations/s |
| Thermal resistance | $-40^{\circ} \mathrm{C} \ldots+70^{\circ} \mathrm{C} / 85^{\circ} \mathrm{C}$, standard / sensitive coil |
| Maximum permissible coil temperature | $<125 \mathrm{~K} / \mathrm{W}$ |
| Vibration resistance (function) | $130^{\circ} \mathrm{C}$ |
| Shock resistance, half sinus, 11 ms | 30 g (function) |
| Degree of protection | 100 g (damage) |
| Needle flame test | immersion cleanable, IP 67 |
| Mounting position | application time 20 s, burning time $<15 \mathrm{~s}$ |
| Processing information | any |
| Weight (mass) | Ultrasonic cleaning is not recommended |
| Resistance to soldering heat | max. 4 g |

All data refers to $23^{\circ} \mathrm{C}$ unless otherwise specified.

## Packing

Tube dimensions - 25 relays per tube, 625 relays per box

## IM Relays

$4^{\text {th }}$ generation slim line - low profile polarized $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from $1.5 \ldots 24 \mathrm{~V}$, coil power consumption of $140 \ldots 200 \mathrm{~mW}$, latching relays with 1 coil 100 mW . The IM relay is available as through hole and surface mount type (J-Legs and Gull Wings) and capable to switch loads up to 60 W/62,5 VA. Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-$ $2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The IM relay is CECC/IECO approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. $10 \times 6 \mathrm{~mm}$ board space and 5.65 mm height.

## P2 Relays

$3^{\text {rd }}$ generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 24 V , coil power consumption 140 mW , latching relays with 1 coil 70 mW . The P 2 relay is available as through hole or surface mount type and capable to switch currents up to 5 A . Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and 10 mm height.

## FX Relays

$3^{\text {rd }}$ generation polarized $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 3 ... 48 V , coil power consumption of 80 ... 260 mW for the high sensitive version, $140 \ldots 300 \mathrm{~mW}$ for the standard version, latching relays with 1 coil 100 mW . The FX2 relay is available as through hole type and capable to switch loads up to $60 \mathrm{~W} / 62,5 \mathrm{VA}$. Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The FX2 is CECC/IECO approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and $10,7 \mathrm{~mm}$ height.

## FT2 / FU2 Relays

$3^{\text {rd }}$ generation non polarized, non latching $2 \mathrm{c} / \mathrm{o}$ telecom relay with bifurcated contacts. Nominal voltage range from $3 \ldots 48 \mathrm{~V}$, coil power consumption 200 ... 300 mW . Most sensitive 48 V relay. Available as through hole and surface mount type. Dielectric strength fulfills the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ and FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. The FT2/FU2 is CECC/IECO approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. $15 \times 7,5 \mathrm{~mm}$ board space and 10 mm height.

## FP2 Relays

$3^{\text {rd }}$ generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from $3 \ldots 48 \mathrm{~V}$, coil power consumption of 80 ... 260 mW for the high sensitive version, $140 \ldots 300 \mathrm{~mW}$ for the standard version, latching relays with 1 coil 100 mW .. The FP2 relay is available as through hole type and capable to switch loads up to $30 \mathrm{~W} / 62,5 \mathrm{VA}$. Dielectric strength fulfills FCC part $68(1,5 \mathrm{kV}-10$ / $160 \mu \mathrm{~s}$ ). The FP2 is CECC/IECQ approved. Dimensions approx. $14 \times 9 \mathrm{~mm}$ board space and 5 mm height.

## MT2 / MT4

$2^{\text {nd }}$ generation non polarized, non latching $2 \mathrm{c} / \mathrm{o}$ and $4 \mathrm{c} / \mathrm{o}$ telecom and signal relay with bifurcated contacts. Nominal voltage range from 4.5 ... 48 V , coil power consumption 150/200/300/400 and 550 mW , and 300 mW (MT4). Dielectric strength fulfills the
requirements according FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$ for both and the Bellcore requirements according GR $1089(2,5 \mathrm{kV}-2 / 10 \mu \mathrm{~s})$ the MT4 only.
Dimensions MT2 approx. $20 \times 10 \mathrm{~mm}$ board space and 11 mm height, MT4 approx. $20 \times 15 \mathrm{~mm}$ board space and 11 mm height.

## D2n Relays

$2^{\text {nd }}$ generation non polarized $2 \mathrm{c} / \mathrm{o}$ relay for telecom and various other applications. Nominal voltage range from 3 ... 48 V , coil power consumption from $150 \ldots 500 \mathrm{~mW}$. The D2n relay is capable to switch currents up to 3 A . Dielectric strength fulfills the requirements according FCC part $68(1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s})$. Dimensions approx. $20 \times 10 \mathrm{~mm}$ board space and $11,5 \mathrm{~mm}$ height.

## P1 Relays

Extremely sensitive, polarized $1 \mathrm{c} / \mathrm{o}$ relay with bifurcated contacts for a wide range of applications, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from $3 . . .24 \mathrm{~V}$, coil power consumption 65 mW , latching relays with 1 coil 30 mW . The P1 relay is available as through hole or surface mount type and capable to switch currents up to 1 A . Dielectric strength fulfills the requirements according FCC part 68 ( $1,5 \mathrm{kV}-10 / 160 \mu \mathrm{~s}$ ). Dimensions approx. $13 \times 7,6 \mathrm{~mm}$ board space and 7 mm height for THT or 8 mm height for SMT version.

## W11 Relays

Low cost, non polarized $1 \mathrm{c} / \mathrm{o}$ relay for various applications. Nominal voltage range from 3 ... 24 V , coil power consumption 450 mW , sensitive versions 200 mW . The W11 relay is capable to switch currents up to 3 A. Dielectric strength 1000 Vrms. Dimensions approx. $15,6 \times 10,6 \mathrm{~mm}$ board space and $11,5 \mathrm{~mm}$ height.

## Reed Relays

High sensitive, non polarized relay for telecom and various other applications, available with $1 \mathrm{n} / \mathrm{o}, 2 \mathrm{n} / \mathrm{o}$ or 1c/o contacts. Nominal voltage range from $5 \ldots 24 \mathrm{~V}$, coil power consumption $50 \ldots 280 \mathrm{~mW}$ for $1 \mathrm{n} / \mathrm{o}$ and $125 \ldots 280 \mathrm{~mW}$ for $2 \mathrm{n} / \mathrm{o}$ or $1 \mathrm{c} / \mathrm{o}$ versions. Reedrelays are available in DIP or SIL housing and capable to switch currents up to 0,5 A. Integrated diode and/or electrostatic shield optional. Dielectric strength 1500 Vdc. Dimensions approx. $19,3 \times 7 \mathrm{~mm}$ board space and 5 ... $7,5 \mathrm{~mm}$ height for DIP or $19,8 \times 5 \mathrm{~mm}$ board space and $7,8 \mathrm{~mm}$ height for SIL version.

## Cradle Relays

Extremely reliable and mature relay family of $1^{\text {st }}$ generation for various signal switching applications. Available as non polarized, polarized / latching and relay with AC coil. The benefit is the possibility of combining various contact sets from 1 up to 6 poles, single and bifurcated contacts, different contact materials with a coil voltage range from $1,5 \mathrm{Vdc}$ to 220 Vac . Cradle relays are available as dust protected and hermetically sealed versions, with plug in or solder terminals and are capable to switch currents up to 5 A . Forcibly guided (linked) contact sets optional. Dielectric strength 500 Vrms. Dimensions from approx. $19 \times 24$ to $19 \times 35 \mathrm{~mm}$ board space and 30 mm height.

## Other Relays

We offer a variety of different relay families for maintenance and replacement purposes. These relays are up to 60 years old now, such as Card Relay SN (V23030 / V23031 series), Small General Purpose Relay (V23006 series), Small Polarized Relay (V23063 ... V23067 and V23163 ... V23167 series). Accessories like sockets, hold down springs, etc. optional.
