

**SpO₂ sensor for flexible applications
and maximum patient safety and comfort**

**Robust and
Multifunctional**

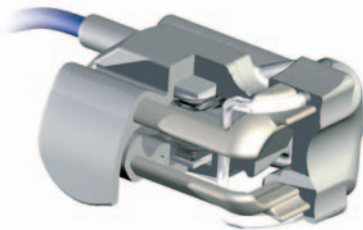

Flexible
safe
robust

EnviteC MultiSoft® SpO₂ sensors

- **Extremely easy cleaning and disinfection**
- **Flexibility in application**
- **Robust and durable**
- **Maximum wear comfort on fingers**
- **Extremely cost effective**
- **Excellent user friendliness**

MultiSoft® – Superior comfort with maximum cost effectiveness

Multifunctional sensor provides many clear advantages

One sensor size meets almost all patient size requirements (Pedi-Adult)

With both high cost pressure and increasing concern over stringent hygiene requirements it's becoming more and more difficult for the clinician to find the right solution for their sensors. With the MultiSoft® sensor, EnviteC offers an uncompromising solution, a flexible finger sensor for all sizes, which is quick and easy to clean. This ensures a rapid return on investment and - thanks to its long-term reusability - huge cost savings as compared with alternative solutions.

Very comfortable for individual patient sizes

Focus on everyday practice

The many advantages offered by this novel sensor are the result of intensive research and development of a system ideal for everyday clinical practice. The special product design enables maximum wearing comfort for all patients with just one sensor size - and with exceptionally accurate measurement results. Of course, our sensor is guaranteed to be compatible with most common patient monitors from the most well-known manufacturers. The sensor's long-term reusability provides additional advantages, such as being cost effective while helping protect the environment.

MultiSoft® – the new SpO₂ sensor

One size for virtually all applications

Unlike other sensors, the MultiSoft® fits almost all finger sizes. This lowers costs and increases the operational efficiency of the clinicians and medical staff.

Robust and reliable

This new sensor is not only extremely resistant to mechanical stress and resulting failure. The life of the product is three times longer than comparable conventional finger sensors.

Optimum handling and maximum comfort

Thanks to the ergonomic design, the number of false alarms is greatly reduced. In addition, special silicon - tested and proven for its biocompatibility - virtually eliminates the possibility of allergic skin reactions.

Safety that you can rely on

EnviteC products are used and trusted throughout the world. Our new sensor guarantees maximum safety standards for patients and medical staff.

Original manufacturer	EnviteC	Nellcor			CSI	
Product number	MF-3227	MF-3212-9	MF-3212-31	MF-3282-30	MF-3282-36	MF-3282-9
Cable length (cm)	120	90	295	295	295	90
Plug	C 45	C 05	C 05	C 08	C 31	C 08
