

ENVITEC

Way ahead in technology

More choice from "One Hand"

Flow Sensors Range

Proven quality
Versatility in application
Affordable prices

Every day, you are required to perform an incredible balancing act: maintaining high quality medical care while maintaining the lowest possible overall operating costs.

Your success will be determined by the use of the right products to meet today's challenges.

At EnviteC we help you succeed with products that meet the needs of your patients and your budget.

With EnviteC as your partner in care, we deliver proven solutions to assist you in the following applications:

- pre hospital area
- hospital area
- post hospital area

The Flow Sensors range offers you from "One Hand" products of a proven performance, guaranteed compatibility and affordable prices.

More choice from "One Hand"

- proven quality
- versatility in application
- affordable prices

Proven quality

The rigorous selection of high quality medical grade materials used for the production of the Flow Sensors and EN ISO based internal quality system makes it possible to meet and exceed the demands of medical practice for durability.

The unique high quality of our flow sensors make this product range high appreciate by our customers world wide.

Versatility in application

The regular EZ-Flow, SpiroQuant A and H were designed for the Flow/Volume ranges of adult and pediatric patients.

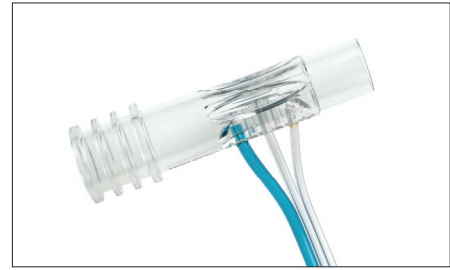

The EnviteC flow sensors range delivers top product that combine high precision, high linearity with small airway resistance.

We can provide you on request with your own OEM based Flow Sensor.

Affordable prices

Now you can leave your logistic problems behind you. The flow sensors you need we provide you uncomplicated from one hand.

The affordable price performance will support your budget.

EZ-Flow™

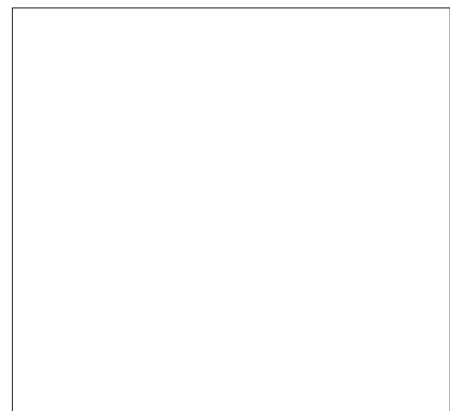

SpiroQuant A

SpiroQuant H

	Measuring Principle	Application
EZ-Flow™	Differential pressure	The regular EZ-Flow was designed for the flow/volume ranges of adult and pediatric patients. The newest EZ-Flow can handle the neonate patients, with reliable volume measurements down to 10cc! Applicable in METEOR -Respiratory Mechanics Monitor and Module.
SpiroQuant A	Constant - temperature-hot wire-anaemometry	Compatible with Dräger Spirolog-sensor PN 8403735
SpiroQuant H	Differential pressure	Compatible with H7400 AccuTach™ applicable in Hamilton Ventilators; H72 VR-1, Galileo, Amadeus, Veolar, Raphael.
