

Interactive Catalog Supplements Catalog PDFs

If you need detailed product information, or help choosing the right product for your application, see our **Interactive Catalog**. Use the **Interactive Catalog** to access the most complete and up-to-date information available.

The **Interactive Catalog** provides an extensive collection of product specifications, application data, and technical literature that can be searched based on criteria you select.

This PDF catalog information was published in November 2000.

Military Specifications Procurement Information

Data Sheet 204W

How To Increase Your Effectiveness In Using Specification MIL-S-8805

The following information is intended to increase your effectiveness in using the Specification MIL-S-8805, minimize your costs and reduce delivery time for switches procured to the Specification.

Standard Items (Shown on QPL 8805)

MICRO SWITCH suggests the following statement be used when ordering items appearing on QPL 8805:

"MICRO SWITCH" catalog listing No. _____ listed on QPL 8805 as No. _____."

Should additional requirements be needed for application of the switch in its end use, they should be specifically stated as part of the ordering information.

Non-Standard Items (Not shown on QPL 8805)

MICRO SWITCH suggests the following statement be used when ordering items which do not appear on QPL 8805:

"Switch drawing No. _____ shall meet the following performance requirements of MIL-S-8805."

The above statement to be supplemented by the performance requirements which you consider applicable.

Why The Suggested Statements Will Minimize Cost and Delivery of Non-Standard Items

Military Specification MIL-S-8805 requires a complete qualification test of non-standard items (**unless you specifically call out the performance requirements which you consider applicable to your switch application**). Complete qualification is costly and will delay shipment of switches. By specifying all those requirements which you consider applicable you can minimize both your cost and delivery flow time. General statements, such as "switch must meet requirements of MIL-S-8805", require complete MIL-S-8805 qualification tests.

MICRO SWITCH believes that you, the user, know best the specific requirements of your application. These requirements may be more or less severe than those reflected by the test parameters of MIL-S-8805. In the interest of supplying switches which will meet your requirements with a minimum of expense and delay, we suggest use of the applicable statement provided for Standard (QPL) items and Non-Standard items (not on QPL). MICRO SWITCH solicits submittal of your proposal prints for review and comment. This review may result in savings of time and dollars for you.
