## Subminiature Basic Switch

## SS Series Compatible Mounting with

## a Simple Construction and Easy－to－Use Design Concept

－Insert molded case provides enhanced resistance to flux．
－Switch rating of 3 A at 125 V AC possible with a single－ leaf movable spring．Models for micro loads are also avail－ able．
－Solder，quick－connect terminals（\＃110），and PCB termi－ nals are available，including even－pitched PCB terminals．

## Ordering Information

## －Model Number Legend

1．Ratings
3： 3 A at 125 VAC
01：$\quad 0.1 \mathrm{~A}$ at 30 VDC
2．Contact Gap
G：$\quad 0.5 \mathrm{~mm}$
3．Actuator
None：Pin plunger
L：Hinge lever
L13：Simulated roller lever

4．Terminals
None：Solder terminals
T：Quick－connect terminals（\＃110）
D：PCB terminals（Uneven pitch）
B：PCB terminals（Even pitch）

## ■ List of Models

| Rating | Actuator | Terminals | Solder terminals | Quick－connect terminals（\＃110） | PCB terminals |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  |  |  | Uneven pitch | Even pitch |
| 3 A | Pin plunger | $\square$ | SS－3GP | SS－3GPT | SS－3GPD | SS－3GPB |
|  | Hinge lever |  | SS－3GLP | SS－3GLPT | SS－3GLPD | SS－3GLPB |
|  | Simulated roller lever | R | SS－3GL13P | SS－3GL13PT | SS－3GL13PD | SS－3GL13PB |
| 0.1 A | Pin plunger | － | SS－01GP | SS－01GPT | SS－01GPD | SS－01GPB |
|  | Hinge lever |  | SS－01GLP | SS－01GLPT | SS－01GLPD | SS－01GLPB |
|  | Simulated roller lever | م | SS－01GL13P | SS－01GL13PT | SS－01GL13PD | SS－01GL13PB |

## Specifications

## －Ratings

| Rated voltageModel <br> Item | SS－3P | SS－01P |
| :--- | ---: | :--- | :--- |
|  | Resistive load |  |
| 125 VAC | 3 A | 0.1 A |
| 30 VDC | 3 A | 0.1 A |

Note：1．The ratings values apply under the following test conditions．
Ambient temperature： $20 \pm 2^{\circ} \mathrm{C}$
Ambient humidity： $65 \pm 5 \%$
Operating frequency： 30 operations $/ \mathrm{min}$
2．Contact your OMRON representative for information on models for other loads．

## ■ Characteristics

| Operating speed | 0.1 mm to $1 \mathrm{~m} / \mathrm{s}$（for pin plunger models） |
| :---: | :---: |
| Operating frequency | $\begin{array}{ll}\text { Mechanical：} 300 \text { operations } / \mathrm{min} \\ \text { Electrical：} & 30 \text { operations } / \mathrm{min}\end{array}$ |
| Insulation resistance | $100 \mathrm{M} \Omega \mathrm{min}$ ．（at 500 VDC ） |
| Contact resistance（initial value） | $\begin{array}{ll} \text { SS-3P: } & 50 \mathrm{~m} \Omega \max . \\ \text { SS-01P: } & 100 \mathrm{~m} \Omega \max . \end{array}$ |
| Dielectric strength（See note 2） | 1，000 VAC， $50 / 60 \mathrm{~Hz}$ for 1 min between terminals of the same polarities <br> $1,500 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$ for 1 min between current－carrying metal parts and ground， and between each terminal and non－current－carrying metal parts |
| Vibration resistance（See note 3） | Malfunction： 10 to $55 \mathrm{~Hz}, 1.5-\mathrm{mm}$ double amplitude |
| Shock resistance（See note 3） | Destruction： $1,000 \mathrm{~m} / \mathrm{s}^{2}$ \｛approx． 100 G$\}$ max． <br> Malfunction： $300 \mathrm{~m} / \mathrm{s}^{2}$ \｛approx． 30 G$\}$ max． |
| Durability（See note 4） | Mechanical： $1,000,000$ operations $\min .(60$ operations $/ \mathrm{min})$   <br> Electrical： SS－3P： 70,000 operations $\min .(20$ operations $/ \mathrm{min}, 125 \mathrm{VAC})$ <br>   100,000 operations $\min .(20$ operations $/ \mathrm{min}, 30 \mathrm{VDC})$ <br>  SS－01P： 200,000 operations $\min .(20$ operations $/ \mathrm{min})$ |
| Degree of protection | IEC IP40 |
| Degree of protection against electrical shock | Class I |
| Proof Tracking Index（PTI） | 175 |
| Ambient operating temperature | $-25^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$（at ambient humidity of 60\％max．）（with no icing） |
| Ambient operating humidity | $85 \%$ max．（for $5^{\circ} \mathrm{C}$ to $35^{\circ} \mathrm{C}$ ） |
| Weight | Approx． 1.6 g （for pin plunger models） |

Note：1．The data given above are initial values．
2．The dielectric strength shown in the table indicates a value for models with a Separator．
3．For the pin plunger models，the above values apply for both the free position and total travel position．For the lever models，the values apply at the total travel position．Contact opening or closing time is within 1 ms ．
4．Contact your OMRON sales representative for testing conditions．

## －Approved Standards

－UL，CSA，and EN approval projected for September 2003.

## ■ Contact Specifications

| Item | Model | SS－3P | SS－01P |
| :--- | :--- | :--- | :--- |
| Contact | Specification | Rivet | Crossbar |
|  | Material | Silver alloy | Gold alloy |
|  | Gap <br> （standard value） | 0.5 mm |  |
|  | 160 mA at 5 VDC | 1 mA at 5 VDC |  |

Note：For more information on the minimum applicable load，re－ fer to Using Micro Loads on page 6.

## ．Contact Form

SPDT

## Dimensions

## Terminals

Note：All units are in millimeters unless otherwise indicated．（Terminal plate thickness is 0.5 mm for all models．）

## Solder Terminals

PCB Terminals（Uneven pitch）

## PCB Mounting Dimensions（Reference）

Quick－connect Terminals（\＃110）

PCB Terminals（Even pitch）

PCB Mounting Dimensions（Reference）

## －Mounting Holes

Two，2．4－dia．mounting holes or M2．3 screw holes

## －Dimensions and Operating Characteristics

Note：1．All units are in millimeters unless otherwise indicated．
2．The following illustrations and drawings are for solder terminal models．Refer to page 4 for details on models with quick－connect terminals（\＃110）or PCB terminals．

3．Unless otherwise specified，a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions．
4．The operating characteristics are for operation in the A direction（ ）．
Pin Plunger Models

SS－3GP
SS－01GP

| Model | SS－3GP | SS－01GP |

| FP max． | 13.6 mm |  |
| OP | $8.8 \pm 0.8 \mathrm{~mm}$ |  |

## Simulated Roller Lever Models

## SS－3GL13P SS－01GL13P

| Model | SS－3GL13P | SS－01GL13P |
| :--- | :--- | :--- |
| OF max． | 0.5 N |  |
| RF min． | 0.05 N |  |
| OT min． | 1.0 mm |  |
| MD max． | 0.8 mm |  |
| FP max． | 15.5 mm |  |
| OP | $10.7 \pm 0.8 \mathrm{~mm}$ |  |

## Precautions

## －Cautions

## Connecting to Solder Terminals

When soldering the lead wire to the terminal，first insert the lead wire conductor through the terminal hole and then conduct sol－ dering．
Make sure that the temperature at the tip of the soldering iron is 350 to $400^{\circ} \mathrm{C}$ ．Do not take more than 3 seconds to solder the switch terminal，and do not impose external force on the terminal for 1 min after soldering．Improper soldering involving an exces－ sively high temperature or excessive soldering time may deterio－ rate the characteristics of the Switch．

## Connecting to Quick－connect Terminals

Wire the quick－connect terminals（\＃110）with receptacles．Insert the terminals straight into the receptacles．Do not impose exces－ sive force on the terminal in the horizontal direction，otherwise the terminal may be deformed or the housing may be damaged．

## Connecting to PCB Terminal Boards

When using automatic soldering baths，we recommend soldering at $260 \pm 5^{\circ} \mathrm{C}$ within 5 seconds．Make sure that the liquid surface of the solder does not flow over the edge of the board
When soldering by hand，as a guideline，solder with a soldering iron with a tip temperature of 350 to $400^{\circ} \mathrm{C}$ within 3 seconds，and do not apply any external force for at least 1 minutes after solder－ ing．When applying solder，keep the solder away from the case of the Switch and do not allow solder or flux to enter the case．

## －Correct Use

## Mounting

Turn OFF the power supply before mounting or removing the Switch，wiring，or performing maintenance or inspection．Failure to do so may result in electric shock or burning．
Use M2．3 mounting screws with plane washers or spring washers to securely mount the Switch．Tighten the screws to a torque of 0.23 to $0.26 \mathrm{~N} \cdot \mathrm{~m}\{2.3$ to $2.7 \mathrm{kgf} \cdot \mathrm{cm}\}$

Mount the Switch onto a flat surface．Mounting on an uneven sur－ face may cause deformation of the Switch，resulting in faulty oper－ ation or breakage in the housing．

## Operating Stroke Setting

Take particular care in setting the operating stroke for the pin plunger models．Make sure that the operating stroke is $60 \%$ to $90 \%$ of the rated OT distance．Do not operate the actuator exceeding the OT distance，otherwise the life expectancy of the Switch may be shortened．

## Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact．Use models that operate in the following range．However，even when using micro load models within the operating range shown below，if inrush current occurs when the contact is opened or closed，it may increase contact wear and so decrease life expectancy．There－ fore，insert a contact protection circuit where necessary．
The minimum applicable load is the N －level reference value．This value indicates the malfunction reference level for the reliability level of $60 \%\left(\lambda_{60}\right)$ ．The equation，$\lambda_{60}=0.5 \times 10^{-6} /$ operations indi－ cates that the estimated malfunction rate is less than $1 / 2,000,000$ operations with a reliability level of $60 \%$ ．

## －Separators

| Thickness | Model |
| :--- | :--- |
| 0.18 mm | Separator for SS0．18 |
| 0.4 mm | Separator for SS0．4 |

## Separator for SS $\square$

Note：The material is EAVTC（Epoxide Alkyd Varnished Tetron Cloth）and its heat－resisting temperature is $130^{\circ} \mathrm{C}$ ．

## －Connectors

Use the following quick－connect connector made by Nippon Tan shi or Tyco Electronics．This connector is not sold by OMRON Contact the following Nippon Tanshi or Tyco Electronics office to purchase this connector
Nippon Tanshi Co．，Ltd．Japan Tel：（81）463－30－1150 Hong Kong Tel：（852）2191－2727
Tyco Electrocics AMP K．K．Japan Tel：（81）44－844－8111

$$
\text { U.S.A. } \quad \text { Tel (1)800-522-6752 }
$$

This connector is for use with the SS－P and the terminal direction is $90^{\circ}$ different from the SS Series．

## ALL DIMENSIONS SHOWN ARE IN MILLIMETERS．

To convert millimeters into inches，multiply by 0.03937 ．To convert grams into ounces，multiply by 0.03527 ．
