## A Sealed Switch for Mechanical

## Detection in Automobiles and Industrial Vehicles（Conforming to IP67）

■ Single－point mounting with an M4 screw．
■ Incorporates a fixed leaf lever for tough environ－ ments．

■ Molded lead wires are installed using lead－free connections for environmental conservation．

## Ordering Information

## －Model Number Legend

1．Ratings／Contact Specifications
0：For micro load
2：For general load
2．Actuator
7 Leaf lever
8：Long leaf lever
－List of Models

| Actuator | Rated load | Contact specifications （molded lead wires） | Model |
| :---: | :---: | :---: | :---: |
| Leaf lever | 0.1 A | SPDT | D2FW－G071M |
|  |  | SPST－NC | D2FW－G072M |
|  |  | SPST－NO | D2FW－G073M |
|  | 1 A | SPDT | D2FW－G271M |
|  |  | SPST－NC | D2FW－G272M |
|  |  | SPST－NO | D2FW－G273M |
| Long leaf lever | 0.1 A | SPDT | D2FW－G081M |
|  |  | SPST－NC | D2FW－G082M |
|  |  | SPST－NO | D2FW－G083M |
|  | 1 A | SPDT | D2FW－G281M |
|  |  | SPST－NC | D2FW－G282M |
|  |  | SPST－NO | D2FW－G283M |

Note：The standard length of the lead wires（AVS0．5）is 30 cm ．

## Specifications

## ■ Ratings

| Rated voltage | D2FW－G0 $\square$（micro load models） | D2FW－G2 $\square$（general－load models） |
| :--- | :--- | :--- |
|  |  | Resistive load |
| 30 VDC | 0.1 A | 1 A |

## ■ Characteristics

| Item | D2FW－G0 $\square$ | D2FW－G2 $\square$ |
| :---: | :---: | :---: |
| Operating speed | 1 to $500 \mathrm{~mm} / \mathrm{s}$ |  |
| Operating frequency | Mechanical：120 operations／min max． Electrical： 20 operations／min max． |  |
| Insulation resistance | $100 \mathrm{M} \Omega \mathrm{min}$ ．（at 500 VDC ） |  |
| Contact resistance | $150 \mathrm{~m} \Omega$ max．（at $6 \mathrm{VDC}, 0.1 \mathrm{~A})$ | $100 \mathrm{~m} \Omega$ max．（at $6 \mathrm{VDC}, 1 \mathrm{~A}$ ） |
| Dielectric strength | $600 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$ for 1 min between terminals of the same polarity $1,500 \mathrm{VAC}, 50 / 60 \mathrm{~Hz}$ for 1 min between current－carrying metal parts and ground，and between each terminal and non－current－carrying metal parts |  |
| Vibration resistance | Malfunction： 10 to 55 Hz ，1．5－mm double amplitude，1－ms max．contact opening |  |
| Shock resistance | Destruction： $1,000 \mathrm{~m} / \mathrm{s}^{2} \mathrm{max}$ ． <br> Malfunction： $300 \mathrm{~m} / \mathrm{s}^{2}$ max．，1－ms max．contact opening |  |
| Life expectancy | Mechanical：300，000 operations min． |  |
|  | Electrical：100，000 operations min． | Electrical：30，000 operations min． |
| Degree of protection | Conforms to IP67． |  |
| Degree of protection against electric shock | Class 1 |  |
| Proof tracking index（PTI） | 175 |  |
| Ambient operating temperature | $-40^{\circ} \mathrm{C}$ to $85^{\circ} \mathrm{C}$（at ambient humidity of 60\％max．）（with no icing） |  |
| Ambient operating humidity | 95\％max．（ $5^{\circ} \mathrm{C}$ to $35^{\circ} \mathrm{C}$ ） |  |
| Weight | Approx． 10.4 g （SPDT type） |  |

## －Contact Specifications

| Item | D2FW－G0 $\square$（micro load models） | D2FW－G2 $\square$（general－load models） |
| :--- | :--- | :--- |
| Specification | Crossbar | Silver alloy |
| Material | Gold alloy | 100 mA at 5 VDC |
| Gap（standard value） | 0.25 mm | 1 |
| Minimum applicable load | 1 mA at 5 VDC |  |

## －Contact Form

SPST－NC

SPST－NO

＊The color in parentheses indicates the color of the lead wire．

## Dimensions

## ■ Mounting Holes

Note：All units are in millimeters unless otherwise indicated．

## ■ Dimensions and Operating Characteristics

Note：1．All units are in millimeters unless otherwise indicated．
2．The operating characteristics are for operation in the A direction（

## D2FW－G $\square 7$ M

（Leaf Lever Models）

| Model | Leaf Lever Models |
| :--- | :--- |
|  | D2FW－G $\square \mathbf{7} \square \mathbf{M}$ |
| OF max． | 2.45 N |
| RF min． | 0.29 N |
| OT min． | 1.0 mm |
| MD max． | 1.0 mm |
| FP max． | 15.5 mm |
| OP | $11.5 \pm 2 \mathrm{~mm}$ |
| TTP | $(6.5 \mathrm{~mm})$ |

## D2FW－G $\square$ 8 $\square$ M

（Long Leaf Lever Models）

| Model | Long Leaf Lever <br> Models |
| :--- | :--- |
|  | D2FW－G $\square \mathbf{8} \square \mathbf{M}$ |
| OF | 2.94 N |
| RF min． | 0.59 N |
| OT min． | 1.0 mm |
| MD max． | 1.0 mm |
| FP max． | 19 mm |
| OP | $12 \pm 2 \mathrm{~mm}$ |
| TTP | $(8.5 \mathrm{~mm})$ |

## Precautions

Refer to pages 26 to 33 for common precautions．

## －Cautions

Use the Switch within the specified electrical ratings．Using the Switch outside of the rated values will not only shorten its service life but may cause heat generation or fire damage．When turning the power ON or OFF，use the rated voltage and current．

## Degree of Protection

Do not use the Switch underwater．The Switch was tested and found to meet the conditions necessary to meet the following standard． The test checks for water intrusion after immersion for a specified time period．The test does not check for switching operation under－ water．
IEC Publication 529，degree of protection IP67．

## Protection Against Chemicals

Prevent the Switch from coming into contact with oil or chemicals． Otherwise，damage to or deterioration of Switch materials may re－ sult．

## ■ Correct Use

## Mounting

Turn OFF the power supply before mounting or removing the Switch，wiring，or performing maintenance or inspection．Failure to do so may result in electric shock or burning．
Use M4 mounting screws with plane washers or spring washers to securely mount the Switch．Tighten the screws to a torque of 1.18 to $1.47 \mathrm{~N} \bullet \mathrm{~m}\{12$ to $15 \mathrm{kgf} \bullet \mathrm{cm}\}$ ．
Mount the Switch onto a flat surface．Mounting on an uneven sur－ face may cause deformation of the Switch，resulting in faulty opera－ tion or breakage in the housing．

## Switch Mounting

When mounting the Switch，do not apply force to the actuator in any direction other than its operating direction．

## Operation

Make sure that the switching object is perfectly separated from the actuator when the switch is not operated and the actuator is pressed appropriately by the switching object when the switch is operated． The switching object must not move beyond its operational limit position，otherwise the Switch may be damaged．
Install the switching object so that its moving direction is the same as that of the actuator．

## Using Micro Loads

Using a model for ordinary loads to open or close the contact of a micro load circuit may result in faulty contact．Use models that oper－ ate in the following range．However，even when using micro load models within the operating range shown below，if inrush current oc－ curs when the contact is opened or closed，it may increase contact wear and so decrease life expectancy．Therefore，insert a contact protection circuit where necessary．
The minimum applicable load is the N －level reference value．This value indicates the malfunction reference level for the reliability lev－ el of $60 \%$（ $\lambda 60$ ）．The equation，$\lambda 60=0.5 \times 10^{-6} /$ operations indi－ cates that the estimated malfunction rate is less than $1 / 2,000,000$ operations with a reliability level of $60 \%$ ．
