

HBM Force transducers 力传感器

HBM force transducers measure static and dynamic tensile and compressive loads and virtually without any displacement. They can be supplied in the most varied of designs and classes of accuracy. Typical application areas include bench testing, e.g. measuring force to check material quality and automation technology, e.g. for monitoring quality features when reshaping or bonding features when reshaping or bonding. HBM's own DKD calibration laboratory mirrors the Company's competence in the area of force measurement.

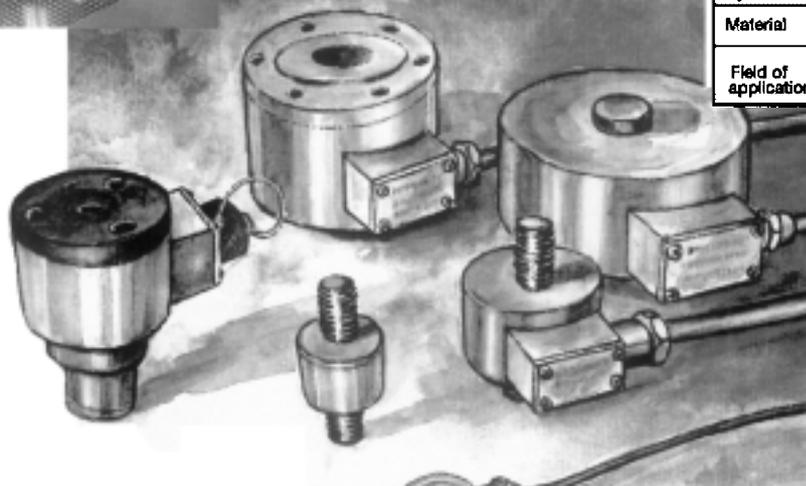

DKD Calibration services for force

In order to enable our customers to trace their force measurements to the national standards, the independent calibration laboratory at HBM has been accredited for the quantity "force" to EN 45001 by the Physikalisch-Technische Bundesanstalt PTB (German Metrology institute). We offer the services of this calibration laboratory within the framework of the DKD (German Calibration Service).

HBM Torque transducers 扭矩传感器

HBM torque transducers are used in many branches of industry and research: plant supervision and process monitoring, motive power engineering and materials handling technology, test bench technology, quality assurance, and research and development. The HBM torque range includes torque transducers and flanges, as well as nonrotational torque transducers for measuring reactions. Slip-ring or non-contacting signal transmission is used. Tested couplings are also available together with torque transducers. HBM also offers matching amplifiers and measurement technology software for processing and analysing measurement signals.

HBM Pressure transducers 压力传感器

Electrical pressure gauges from HBM are used for taking measurements in the most widely differing fields: hydraulic and pneumatic equipment, fluid-technology, chemical and process plant, air conditioning equipment, the food industry, construction etc. Absolute pressure, gauge pressure or differential pressure gauges are available to suit the respective fields of application. Transducers made from high-alloy stainless steels are suitable for determining static and dynamic pressure in aggressive fluids or gases.

DKD calibration services for pressure

To enable our customers to trace their pressure measurements to the national standards, the independent calibration laboratory at HBM has been accredited for the quantity "pressure" to EN 45001 by the PTB [German Metrology Institute]. We are offering the services of this calibration laboratory within the framework of the DKD [German Calibration Service].

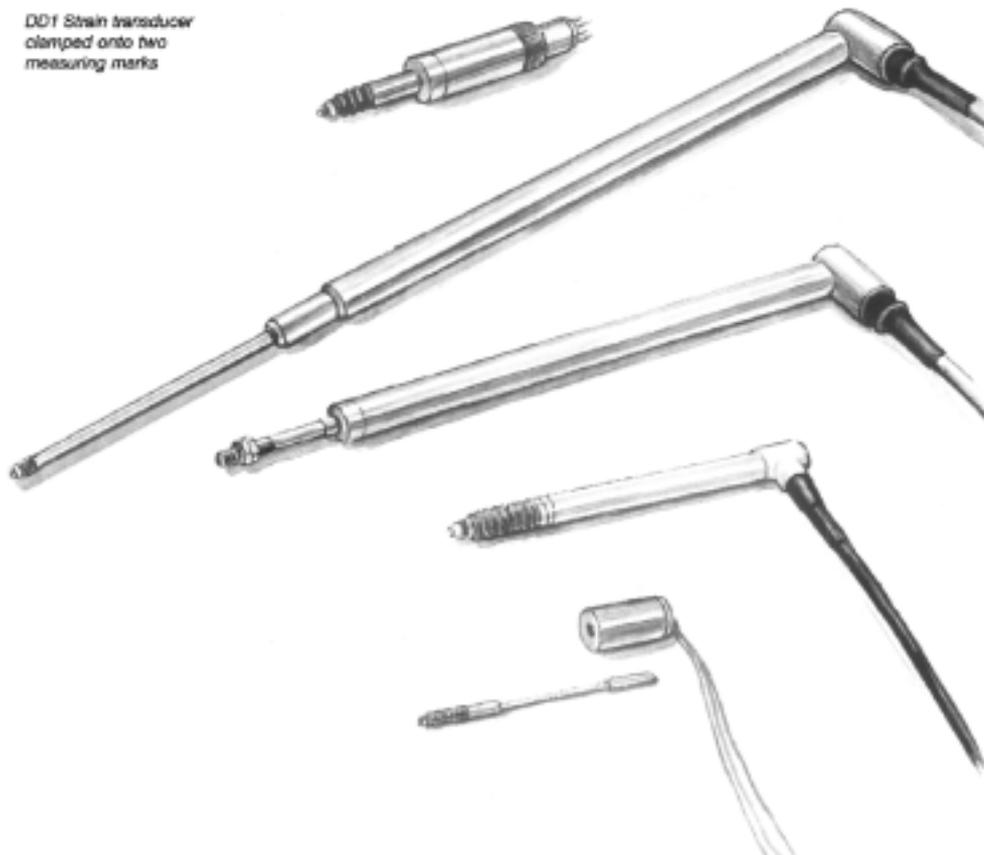

HBM 位移和应变力及加速度传感器

DD1 Strain transducer
clamped onto two
measuring marks

The inductive displacement measurement principle has penetrated many sectors of industry and research because it is both robust and maintenance-free. For years, HBM has been building inductive displacement transducers, which can be used universally for measuring displacement in conjunction with carrier frequency amplifiers. The areas of application here vary from precision measurement in the machine to simple displacement monitoring during manufacturing and assembly or the supervision of construction projects.

**Strain transducer
SLB700A**

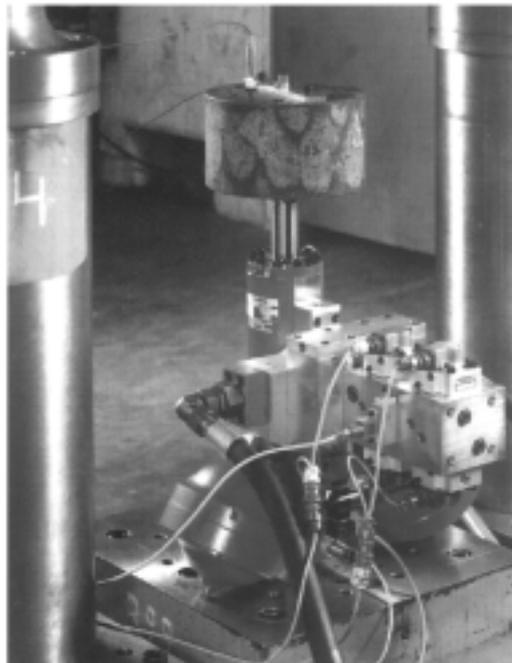

Simple bolt-on design
Nominal strain 500 µm/m
Strain gauge full bridge
Nominal sensitivity 1.5 mV/V

**Strain transducer
DD1**

For usage as clamp-type
Nominal displacement ± 2.5mm
Strain gauge full bridge
Nominal sensitivity ± 2.5mV/V

**Acceleration transducer
B12**

Simple bolt-on design
Inductive measuring system
Nominal acceleration depending on type
± 200 and ± 1000 m/s²

**Strain
Acceleration**

In addition to the comprehensive range of products for quantities such as force, torque, pressure, and displacement HBM also offers strain and acceleration transducers.

Strain transducers such as the SLB700A are used, e.g. for the monitoring of press uprights.

The B12 acceleration transducer enables constant accelerations to be measured and, in addition, vibrational and impact accelerations.

SUNSTAR 商斯达实业集团是集研发、生产、工程、销售、代理经销、技术咨询、信息服务等为一体的高科技企业，是专业高科技电子产品生产厂家，是具有 10 多年历史的专业电子元器件供应商，是中国最早和最大的仓储式连锁规模经营大型综合电子零部件代理分销商之一，是一家专业代理和分销世界各大品牌 IC 芯片和电子元器件的连锁经营综合性国际公司，专业经营进口、国产名厂名牌电子元件，型号、种类齐全。在香港、北京、深圳、上海、西安、成都等全国主要电子市场设有直属分公司和产品展示展销窗口门市部专卖店及代理分销商，已在全国范围内建成强大统一的供货和代理分销网络。我们专业代理经销、开发生产电子元器件、集成电路、传感器、微波光电元器件、工控机/DOC/DOM 电子盘、专用电路、单片机开发、MCU/DSP/ARM/FPGA 软件硬件、二极管、三极管、模块等，是您可靠的一站式现货配套供应商、方案提供商、部件功能模块开发配套商。商斯达实业公司拥有庞大的资料库，有数位毕业于著名高校——有中国电子工业摇篮之称的西安电子科技大学（西军电）并长期从事国防尖端科技研究的高级工程师为您精挑细选、量身订做各种高科技电子元器件，并解决各种技术问题。
