

# MINIATURE THERMOPILE DETECTORS FOR GAS SENSING AND MEASUREMENT

## TPD 0223, TPD 0623 Thermopile

### Applications

- Non-contact temperature measurements
- IR based gas sensors

### Features and Benefits

- TO-46 metal housing
- Square window
- Optical filter options
- Thermistor included

### Product Description

This is our range of general-purpose miniature thermopile detectors in 4.7 mm diameter TO-46 type housings. Both feature a specially-designed element configuration, each one with a different size of absorbing area. The window is available as standard infrared or as narrow band pass filter for gas sensing applications. The TPD0223 provides the smallest absorbing area, the TPD 0623 is a larger design offering strong signals. Both types are equipped as standard with an internal thermistor as temperature reference for thermopile temperature compensation.
