Cable Assembly

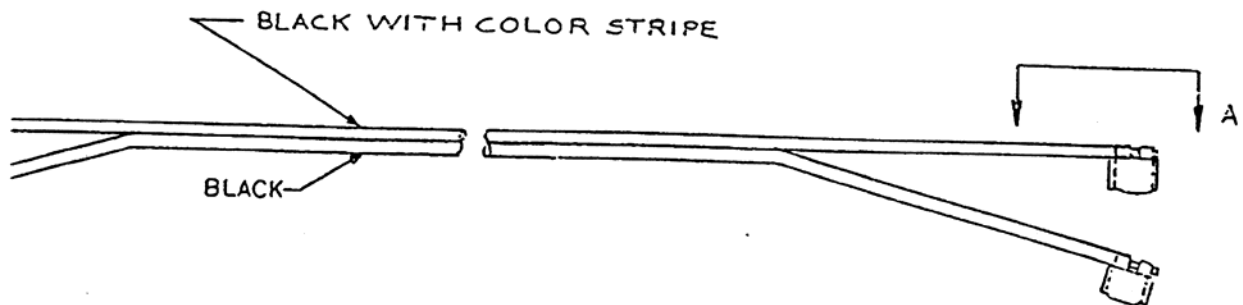

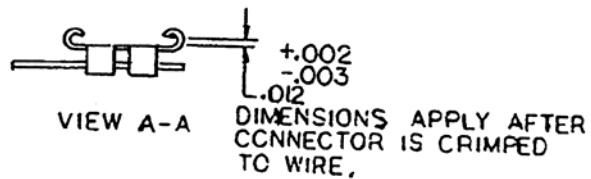

SensComp Electronic Component –Cable Assembly for our Electrostatic Transducers

Features
Ease of Connecting to Series 600 and Series 7000 Electrostatic Transducers
Part No.
PID# 604789LF – Cable Assembly (RoHS Compliant)
Specifications
Length 9.5 inches Wire Gauge 24 AWG 7/32 Stranded Tinned Copper Core
Description

Specifications

The Electrostatic Cable assembly, usually a component part of the 6500 Sonar Ranging Module, contains clips to connect between the Series 600 (or the Series 7000) Electrostatic Transducer and the 6500 Sonar Ranging Module's drive electronics. The Black (with color stripe) lead is connected to GND, and connects to the minus (-) transducer connection.
