

EMC Components

EMC Filters for AC Power Supply Cased (3-Phase, Large Size)

ZRCT-ME Series

FEATURES

- The ZRCT-ME series employ a highly efficient thermal design, which ensures high current handling capacity in a compact package with superior EMC suppression characteristics.
- They are highly effective at preventing both the radiation and penetration of EMC noise. The parts are, therefore, highly immune to externally generated noise and do not, themselves, serve as sources of radiated noise.
- For the CISPR frequency band, this product provides superior attenuation for both differential mode and common-mode noise components.
- The withstand voltage between line and ground is AC.2000V.
- Single-direction block terminal design simplifies wiring requirements, thereby improving workflow.

SAFETY STANDARDS

Part No.	Rated voltage	CSA	TÜV
ZRCT2XXX-ME	250V	LR76849C	R9750102
ZRCT4XXX-ME	440V		R9750101

APPLICATIONS

Computers, general purpose inverters, UPE (uninterruptible power equipment), computer control devices, NC control devices, etc. Highly recommended for large equipment destined for CE countries, where compliance with EMC radiation standards is required as part of CE marking certification.
