EMC Filters for AC Power Supply Inlet-Socket

ZUG-11S, ZUG-11AS Series

ZUG-11S, ZUG-11AS SERIES

FEATURES

- This inlet-socket type EMC filter prevent microcomputer operational errors by use of a common-mode choke coil featuring an amorphous core with exceptional magnetic characteristics.
- Sharply attenuates high voltage pulses entering from the power supply line. For example, the ZUG2203-11S achieves over 20dB of attenuation for a 700V, 400ns input pulse.
- These IEC-type inlet sockets incorporate small, high-performance EMC filters with outstanding attenuation characteristics for both common-mode and differential mode noise components.
- Two types of connection terminals are offered: Faston® #250 (ZUG-11S series, t: 0.8mm) or lug terminal (ZUG-11AS series).

APPLICATIONS

Personal computers, computer terminals, office automation equipment, digital applied devices (ECRs, electronic calculators, electronic scales, etc.), measurement devices, medical equipment, etc. Particularly appropriate for various types of electronic devices that require miniaturization.
