

**VOLTAGE CONTROLLED
CRYSTAL OSCILLATORS**
HCMOS 5V

Thru-Hole / Gull Wing

0° to 70°C

1 MHz to 175 MHz

These 5V VCXOs generate an HCMOS frequency output which is controlled by an input voltage. The end-point frequency/voltage parameters are defined, as is the center frequency.

GUARANTEED CAPTURE RANGE/ABSOLUTE PULL RANGE

Guaranteed Capture Range (GCR) and Absolute Pull Range (APR) are terms often used interchangeably. MF's Guaranteed Capture Range (GCR) is defined as the minimum guaranteed frequency deviation or "pull" (in ppm) around the nominal frequency, with all effects of temperature, variations in V_{DD} , variations in load, and aging taken into account. This amount of absolute frequency deviation is available under all operating conditions for modulation or capturing other signals. No additional frequency capture allowances are necessary.

FEATURES

- Frequency from 1 MHz to 175 MHz
- Capture-range is fully defined, under all conditions
- Start-up time less than 5 ms
- Low profile package available above 60 MHz
- Choice of thru-hole or gull wing

TYPICAL APPLICATIONS

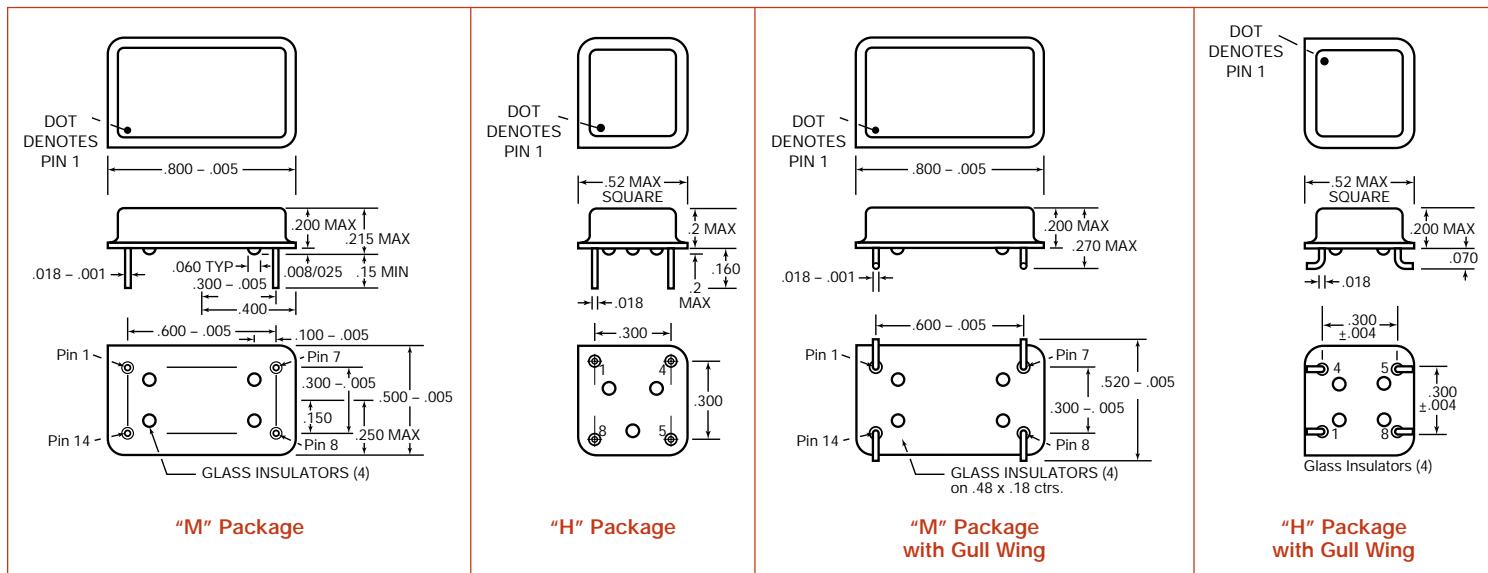

- Phase locked loops and data acquisition projects, including:
 - xDSL customer premise equipment
 - Cable modems
 - ATM/SONET/SDH

Description

Thru-hole VCXOs are available for 5V operation from 1 MHz to 175 MHz. Users have a choice of many off-the-shelf models. Diverse combinations of pull, control voltage and center frequency deviation are available, accommodating a wide variety of filtering and driving circuitry. Standard VCXOs are hermetically sealed in full size (M) or half size (H), DIL packages. All VCXOs are tested and guaranteed over 0 to 70°C. For operation from -40 to +85°C see our extended temperature models.

FREQUENCY STABILITY

Frequency stability vs. Temperature (0 to 70°C) is typically better than ±20 ppm. Since the deviation of each oscillator is tested and guaranteed over the whole operating temperature range, it is not necessary to make additional capture allowance. All oscillators will capture frequencies with the full minimum values of the deviation under all conditions.

QUALITY

Each VCXO is computer-tested at three temperatures to guarantee full compliance to the specification.
