

TruSurround™ 3D AUDIO PROCESSOR

■ GENERAL DESCRIPTION

The **NJM2180** is a TruSurround™ *1) 3D audio processor. It regenerates full surround sound field from two speakers by the TruSurround Virtualizer when either 5.1 channels by Dolby Digital™ *2) or 4 channels by Dolby Pro Logic™ *2) signal is input.

The **NJM2180** also performs the SRS 3D-STEREO. In this mode, **NJM2180** regenerates a 3D sound field from normal L/R input.

In addition, the **NJM2180** includes 2-type BYPASS mode THROUGH and MIX DOWN. In THROUGH mode, the **NJM2180** output 5.1 channels (max.) without any processing and in MIX DOWN mode, the **NJM2180** output normal 2 channels stereo signal from 4 or 5.1 channels input

The **NJM2180** is suitable for TV, mini component, CD radio cassette, multimedia speaker systems and others.

■ PACKAGE OUTLINE

NJM2180L

NJM2180M

For use in Virtual Dolby Surround(VDS) and/or Virtual Dolby Digital(VDD) products, please contact Dolby Laboratories for licensing information.

■ FEATURES

- Operating Voltage (4.7 to 13V)
- Maximum Input Voltage (2.1Vrms typ. at TRU_4 mode, $V^+ \geq 11V$)
- Low Output Noise (35μVrms typ. at TRU_4 mode)
- SRS 3D-STEREO FUNCTION
- BYPASS FUNCTION (THROUGH/MIX DOWN)
- Bipolar Technology
- Package Outline SDIP30, SDMP30

*1)

The TruSurround technology right incorporated in the NJM2180 are owned by SRS Labs, a U.S. Corporation and licensed to New Japan Radio Co., Ltd. TruSurround is protected under U.S. and foreign patents issued and/or pending. TruSurround and the  , are trademarks of SRS Labs, Inc. in the United States and selected foreign countries. Neither the purchase of the NJM2180, nor the corresponding sale of audio enhancement equipment conveys the right to sell commercialized recordings made with any TruSurround technology.

SRS Labs requires that all users of the NJM2180 must enter into a license agreement directly with SRS Labs if the royalty is not included in the purchase price. SRS Labs also requires any users to comply with all rules and regulations as outlined in the TruSurround Trademark Usage Manual.

APPLICATION CIRCUIT

Note: In case of TRU_4 or TSV_4 MODE, input the mono signal of surround channel from Dolby Pro Logic decoder into Rear_L IN terminal or both of Rear_L IN and Rear_R IN terminals.
